

# Kirill Shevtsov

## Front-End Developer

### Personal Info

- Kharkiv, Ukraine
- [kirwork.em@gmail.com](mailto:kirwork.em@gmail.com)
- [+38 \(068\) 447 90 24](tel:+380684479024)
- [LinkedIn](#)
- [GitHub](#)
- [Telegram](#)
- [Personal portfolio site](#)

### Technical skills

- HTML
- CSS/Sass
- JavaScript (ES5, ES6)
- React
- Redux
- SVG
- GIT
- NodeJs/NPM
- Webpack
- Linux Command line
- Photoshop/Illustrator

### Languages

- English - intermediate
- Russian - native
- Ukrainian - native

I came to web development about three years ago. During this time, I studied by myself basic Web technologies - HTML, CSS, JavaScript. Also, I completed several freelance projects.

Currently, I also continue to engage in self-education - I study various approaches to web development and try them in practice. I'm writing my own projects. I'm interested in everything related to UX / UI, performance, accessibility, design.

### Experience

2017 - present	<b>Freelancer. Front-end developer</b> <b>What am I doing:</b> <ul style="list-style-type: none"><li>I make HTML and CSS adaptively and semantically to make the site look pretty;</li><li>I write interfaces on React;</li><li>I use Redux as the single source of truth;</li><li>Sometimes I can and in design (if it's not available or it's necessary to add something quickly);</li><li>I write client-side (and more recently, a little server-side) JavaScript so that the forms were validated and sent and the data from third-party APIs were received;</li><li>I try not to use third-party libraries without urgent need. After all, we want to get the minimum bundle size, isn't it?</li><li>If you still can't do without a library, then, without false modesty, I can find the right one for a specific task and, after reading its documentation, start using it. One recent example is the Nightmare.js library. Its use in a short time helped solve customer problems;</li><li>I can "fasten" something necessary and useful to an existing project. I can also dig deeper into the code for error correction;</li><li>I estimate the deadlines for fulfilling tasks and observe them;</li><li>I use ESLinter according to Airbnb's precepts (yes, I read their March theses on GitHub);</li></ul>
2001 - 2016	<b>Sales manager (The job which not related to vacancy)</b> <b>What I was doing:</b> <ul style="list-style-type: none"><li>Supplies of industrial electrical equipment</li><li>I searched (and quite successfully) for new customers and suppliers and negotiated with them. Also, I prepared documentation and participated in tenders.</li></ul>

### Education

1999 - 2003	<b>National Technical University "Kharkiv PolytechnicInstitute"</b> <ul style="list-style-type: none"><li>Specialty - economics and marketing. Incomplete higher education.</li></ul>
-------------	---

### Courses

2016 - 2018	<b>Codecademy</b> <ul style="list-style-type: none"><li>Learn JavaScript.</li><li>Learn ReactJS.</li><li>Learn Responsive Design.</li><li>Make a Website.</li></ul> <b>UDACITY</b> <ul style="list-style-type: none"><li>Responsive Web Design Fundamentals.</li></ul> <b>Hexlet.io</b> <ul style="list-style-type: none"><li>Basics of programming.</li><li>JS: preparation for work.</li><li>Introduction to web development.</li></ul> <b>freeCodeCamp</b> <ul style="list-style-type: none"><li>Responsive Web Design.</li><li>Javascript Algorithms And Data Structures.</li><li>JSON APIs and Ajax.</li><li>Front End Libraries.</li></ul> <b>HTML Academy</b>
